

# YOUR PARTNER

The TERAPO company was established in a 1991 as a repair shop for consumer electronics and computers. The name TERAPO has been derived from three words, TE - television, RA - radio, PO - computers (in Slovak). We are situated in Banská Bystrica, the town in the centre of Slovakia. At present we provide service, marketing, and intermediation in the field of electronics. We assemble PCBs using the latest equipment and technology such as oxygenfree soldering process. According to customer requirements, they can be fitted with SMD parts, using classical and PB-free materials. Our aim has always been the highest quality standards and clients' contentment.

## Production and assembly

- PCBs assembly up to 250 x 330 mm with SMD components
- wave soldering
- reflow soldering
- manual soldering of components
- testing and debugging of electronic systems
- installation of electronic units at clients premises
- installation of electric distribution boxes

## Electronics repair shop

- consumer electronics
- computers
